- ☒ [2pts] Project published on GitHub Pages
- ☒ [1pt] Include a favicon
- ☒ [1pt/each] Use of images (max. 10). Enter Quantity: 1 

In a few sentences, respond to these questions:

What went well in this project, and what was challenging? What would you have done differently? What did you learn?

It all went great! I just ran out of time. Would have loved a little more time practicing Java so I could have completed more of the optional workarounds, but it is what it is! I got a lot better at keyframes and stuff. Super cool project. I don't know if the github publish worked right, but I think it did.
